Who can give it that popular influence? No other person than President Johnson. How can he do it? By changing his Cathinet and domanding an immediate settlement of the Alshama claims against England. We do not know whether President Johnson is interested in this scheme. The fact that it is elarted by his political and personal friends convinces us, however, that he cannot decidedly ilisapprove of it. But as it stands it has no genitine vitality.

day of September, 1866:

To the Loyal Unionists of the South:

The great issue is upon us. The majority in Congress and its supporters firmly declare that the nights of the citizen enumerated in the Constitution and established by the supreme law must be maintained involute. Rebuls and rebel sympathizers assert that the rights of the citizens must belong to the States alone, and under such regulations as the respective States choose voluntarily to prescribe. We have seen this doctrine of State sovereignty curried out in its practical results, until all authority in Congress was to state sortering came one in pac-ies and, until all authority in Congress was ied, the Union temporarily destroyed, the situational rights of the citizens of the South ly annibilated, and the land desoluted by war. We know of no other plan than that Congress, under its constitutional powers, shall now exercise its authority to establish the principal where-by protection is unde eo extensive, with citizenship. We maintain that no State, either by its organic law or logislation, can make transgression on the rights of the citizen legitimet. We demind and ask you to conceil in denianding protection to eyery citizen of the great republic on the basis of equality before the law; and further, that no State government should be recognized as legitimate under the constitution in so far at it does not by its organic law make impartial protection full and complete. Under the observation of State sovereignty, with rebels in the foreground controlling Southern Legislatures and embittered by disappointment in their schemes to destroy the Union, there will be no safety for the logislatures has the scatch of the Sauth. For the purpose of bringing the loyal Unionists of the South anto conjunctive action with the true itlends of Republican Government of the the North, we invite you to send delegates in goodly numbers from all the Southern States, including Missouri, Kentucky, West Virginia, May and and Dolaware, to meet at Independence Itali, in the city of Philadelphia, on the first Woodly of September next. It is proposed that we should meet at that time to recommend measures for the establishment of such government in the South as accords with and protects the rights of all chicages. We trust this call will be responded to by numerous debugations of such as represent the time loyalty of the South and that fand of government which gives full protection to all the rights of the citizen, such as our fathers intended and we claim as our authors intended and we claim as our merthright bither the lovers of constitutional liberty must rule the nation or relich and their sympathizers be permitted to mismite it.—Sind (toyalty or dishugaty lave the keeping of the destinies of the nation? Advertise and Union, Aubatt.

The Convention will meet at Philadelphia.—
They will laud the President and condemn Congress, and then scatter to the North and South, while the great body of the sovereign people make up their minds to work and vore faithfully and pairiotically for the true interests of all, neither too radical nor too conservative—the right and successful policy.

It is replete with state platinudes that sounded well a dozen years ago, but wheth are now as much out of place as a minimumy would be in a freely female sowing society. The whole thing has an office-tholding, John Tyler odor, JWG would advice the President to steer clear of National Conventions got up under the manipulation of Thattow Weed. The trull is that Thanlow Weed and the dublous patriots who have taken upon themselves the work of running the President don't care anything more about him or his policy than they do about a man of attaw.

At the head of the list stands the name of A. W. We call the movement, in addition to its other objectionable features, a single-faced movement. It is that in its worst shape. It is not only a movement of subsurviency on the part of the North to the South, after the pattern of former years, but it is to create out and put shown those principles which are essential to the preservation of the Government through the nit incenderly doctrine of State rights, aways the hobby of Societies, and the basis at all the treason, than has ever heen concocleding that the Government, source and notices.

Daily Evening Espress, Rochester, June 27.

It may shock the nice ideas of propriety which some entertain, but the truth might as well be spoken at once. We mean to make the South wholly free, not only in some, but in fact. We mean to extend Northero ideas, evilication, progress and prosperity Southward as fast as humm agencies will allow. We do not ask—do not desire—the co-operation of the worshippers of definict institutions to help mold the character of our future. Fifty or one handred years hence, and as much sconer as we can, we mean to have a homogenous people, not formed by a continuation and 4 compromise of Northern freedom and Southern Savery; but fully representing the highest and best type of extitication, and tompded on equal and imputing justice. We do not see in what essential respect the Philadelphia Convention will differ from that of the acre-lends at Gloveland, so far as it affects the political standing of those who engage in the movement. We, whose names are tereto amesof, do actify the
we are nequanted with the well located on the Blood
Farm, and known as the "Bale Lease Nag2,"—now
called the "Woodin Well"—and that the said well had
been down about five months and had been thoroughly
tested in all practicable ways without obtaining any oil.
Asa last reart, the owners of the well applied to Got
Hoberts, Superintendent of the Roberts Petroleum
Torpedo Comp my, to operatio on the well. The explodion of two Torpedoes in the third sand rock resulted in
the, production of a dily yill of from sixty to eightly
burries of oil. In view of these facts we confliciently
recommend a trint of the Roberts forpedo to all woll
